Quite a joy and a worthy expansion. with new and creative themes, really more of the same but new and different, I love it. Like the soundtrack, and I love wierd games likes this that are also a bit funny. Hope there's a sequel or at least more from the developer. It's short so beware.. Pretty spooky, especially with friends. You have to search the map for ritual pieces to put on an alter while a demon lurks in the forest. Worst of all, the demon is one of the humans and they can transform at any time. Giving the motive to leave all your friends behind just in case one of them isn't what they seem. Once the demon transforms it stays transformed till the end of the game. Which is kinda funny because one time while me and my friends were playing, it turned to daylight, and we thought the monster had transformed back, and we let our guard down, just then he came dashing out of nowhere. Scared the crap out of us.

Definitely recommend this game, its very fun and scary, but I don't think I'll be buying the full version.

Oh yeah, this is a review written from my experience on the Free Weekend.. Cons:

Short

Minimalist mechanics

Pros:

Not a single hair out of place

Grinding is done in a jiffy

Dat lore. So, this is another casual gem-matching game, and the basic mechanics of the game are perfectly fine. Nothing spectacular or innovative about it, but reasonably competent. If this was it, and it didn't have its game breaking bugs (see below), I'd have given the game a thumbs up. Not a very enthusiastic thumbs up, but still a thumbs up.

What ruins things for me with the game are two things. First of all, bugs. Or rather, *a* bug. On multiple occasions, when just having finishing a level, and in fact while the *Level complete!* message is dropping down from the top of the game, it just stops. It's not frozen, per se, because the animations of gems etc keep running happily, but the message stops in the middle of falling, and then nothing more happens. Fine, you say - I accidentally hit the pause key or something - and the first time around, this is what I thought, too. Except, the keyboard was nowhere near me at the time. And nothing I could think of to do would make the game resume. Eventually, I ended up having to kill it.

Sure, I can re-start the game, redo the level and be on my way, but it's annoying. When it happens again, and again, and again, it goes beyond annoying, however.

The second thing that ruins thing for me is... the story. Now, a game like this doesn't really need a story. It's abstract enough that trying to fit the game play into a narrative is going to be contrived, at best, but I have to agree that one or two similar games have managed to integrate a story of sorts in ways that not only doesn't detract from the game, but actually add to it in a small way.

This, however, is not one of them. While it is possible, and not too time and click-consuming to get past the story elements, they feel decidedly "*glued on*" and redundant, and as you advance through levels, more and more of an annoyance. Then, at some point, they just stop, as if the developers, too, figured that they added nothing and just were something people would click past without caring about. A speed bump, if you will. After this, the story makes intermittent returns, but those just serve to underline how redundant and detached from the actual game the story really is.

So, in conclusion - the actual core game is OK, but seeing as how there are tons of similar games out there that both implement

the core game better (and without game breaking bugs), as well as provide a better context for the game, there really is no compelling reason to bother with this one.. Greeks could rule the world. Alexander did. He took a Greek army to the far Indus. There was nothing left to conquer; the world was his.. Fun and at times challenging. The only problem is that its too short and doesn't do anything to build off the base game mechanic. But for less than a dolar I can't complain.. This game is bad..

Bad Battlesystem Balacning, half naked women, emo main charakter that things he is useless

and when you dont have anyone in the group yea have fun with dieing..

I ended the level with the group on level 13 because the first encounter are waaay to strong for the beginning level. The mapping makes no sense and is not even good as a beginner level and yea..

This game is wasted 1-2 hours time that i dont get back and for 5€ way to expensive the 50 cents are okay or 1€ but when I buy a game for 5€ I want to have the gametime ten times than this like a 10-20 hour gametime..

Sorry for the hate but this game is not really good and not the money worth it..

I can give you some advice:

- let friends or some people test your game when it is finished
- expand your story and upgrade your storytelling skills
- learn mapping and some of these dont even make sense
- work some days more on your balancing, dont make it too difficult and dont make it to easy, get a good balancing for the people that want to buy your game..

1 Positive thing:

I played the whole story to write this and it was kinda weird fun but yea dont want to play this game a second time... Cool collection of SOR style games, controls are responsive and smooth all games run perfectly well and there is a save and load option, what's not to like (:

Played this game a lot when I was younger. In my opinion, one of the best strategy games i've ever played. (I am a big fan of Strategy games).. wkwkwk...

Those opening words.. $\forall(\geq \forall \leq)$

Must see it.. $d(\nabla \nabla)=b$. Viki Spotter: Megapolis is a masterpiece of a game. Like the other games in the series, Megapolis is short, but more challenging than the other games in the series. Graphics are beautiful, puzzles are challenging, the music is annoying so you may want to mute it. 10/10. Two thumbs way up.. There are many good Lego games, but this one is riddled with bugs - stay away. I love these types of games!

In Toledo we have an actual real life escape place with different options. Loved doing it with my friends and any time I see an Escape Room VR game I have to get it.

This is probably the best one out of the group I've tried in VR!
